

PROFILE

Highly organized and detail-oriented administrative professional with over six years of experience providing administrative, operational, and ICT support within educational and business environments. Skilled in office administration, document management, scheduling, record keeping, customer service, and coordinating daily operations. Strong communication and interpersonal skills with proficiency in Microsoft Office Suite, data management, and digital technologies. Recognized for maintaining confidentiality, improving efficiency, and supporting organizational goals through excellent organizational and problem-solving abilities with digital solutions deployment. Skilled in full-stack web development (Node.js, JavaScript, HTML, CSS, MongoDB), UI/UX design, and educational technology systems.

CORE COMPETENCIES

- Full-Stack Web Development (Node.js, Express, MongoDB)
- Frontend Development (HTML5, CSS3, JavaScript)
- Database Design & Management (MongoDB Atlas)
- RESTful API Development
- Educational Management Systems Development
- UI/UX Design (Figma)
- Graphic Design (CorelDRAW, Photoshop, Canva)
- Responsive Web Design
- Version Control & Code Structuring
- Technical Training & ICT Instruction
- Project Documentation & Research Writing

PROJECTS & RESEARCH EXPERIENCE

1. Educational Management System (EMS) – Developer

- Designed and developed a result management system with teacher and parent interfaces.
- Implemented automated grading logic, total score computation, and performance analysis.
- Integrated database storage using MongoDB.
- Built secure login and data retrieval using admission numbers.
- System allows real-time result viewing and printing.

2. Database-Driven Quiz & Practice System

- Developed a CBT-style practice platform for students.
- Migrated hardcoded questions to MongoDB for dynamic content management.
- Designed admin interface for adding and managing questions.
- Implemented result calculation and performance tracking.

3. RESEARCH & ACADEMIC PROJECT

Modeling User Preferences and Demographics in Multi-Criteria Recommendation Using Neural Networks
(Journal Submission Attempt)

- Conducted research on intelligent recommendation systems using Artificial Neural Networks (ANN).
- Designed a multi-criteria recommendation model that integrates user preferences and demographic attributes for improved prediction accuracy.
- Applied machine learning concepts to enhance personalization and decision-making in recommendation systems.
- Developed system architecture and modeling framework for scalable implementation.
- Prepared and submitted manuscript to *ADCAIJ: Advances in Distributed Computing and Artificial Intelligence Journal*.
- Demonstrated strong competence in research methodology, data modeling, and AI system design.

RELEVANT PROFESSIONAL EXPERIENCE

Honey Land College Ipaja Lagos | ICT Instructor|

November 2024 – Present

Firm Summary

Honey Land College is a reputable institution dedicated to academic excellence and moral discipline. The college provides a stimulating and technology-driven learning environment that encourages innovation, creativity, and critical thinking.
